skeletal muscle to bone dark brown pigment in skin Completion Fill in the blanks with terms from Chapter 36. The three different types of muscle tissue are and . Skeletal muscles are controlled by motor neurons. A motor neuron and a skeletal muscle cell meet at a point called a(an) called 434 Chapter 36 . The motor neuron releases a neurotransmitter.

The Nora School, Silver Spring MD

Muscle Tissue Muscle tissue is composed of cells that can contract. Every function that muscle tissue performs—from creating a facial expression to keeping the eyes in focus—is carried out by groups of muscle cells that contract in a coordinated fashion. The human body has three types of muscle tissue: skeletal, smooth, and cardiac.
