Chapter 8 Economics Feasta
Chapter 8 – Economics. So far we have covered issues relating to sustainability and how an engineer can implement their skills within society to work towards sustainable systems. In each of the chapters there has been a common theme as to the cause of the unsustainable systems – the constant drive by society for economic growth. This chapter is therefore intended to explain where economic growth comes from, rival understandings of it in economics and what problems it causes.

Chapter 8 – Economics - Feasta
Hi Brian, Love Feasta’s work. This content seems to be very much in line with ‘Transition Engineering’ – a concept that is being explored by a rapidly growing group from across the globe, looking at how to “effectively manage the risks of un-sustainable resource use and environmental impacts by implementing changes and adaptations in existing engineered systems”.

An introduction to ecological economics - Feasta
Introduction to Demand and Supply; 3.1 Demand, Supply, and Equilibrium in Markets for Goods and Services; 3.2 Shifts in Demand and Supply for Goods and Services; 3.3 Changes in Equilibrium Price and Quantity: The Four-Step Process; 3.4 Price Ceilings and Price Floors; 3.5 Demand, Supply, and Efficiency; Key Terms; Key Concepts and Summary; Self-Check Questions; Review Questions

Economics Unmasked : Philip B. Smith & Manfred Max-Neef. Economics Unmasked leans more towards conspiracy than cock-up as it compellingly spells out the disastrous effects of the ‘free’ market on individuals, communities and the planet. The text often reads as though the whole crumbling edifice of mainstream economics is a ‘designed-for-purpose’ mechanism for progressively syphoning ...
