Chemistry is a big part of your everyday life. You find chemistry in foods, the air, cleaning chemicals, your emotions, and literally every object you can see or touch.. Here are 10 examples of everyday chemistry. Some common chemistry might be obvious, but other examples might surprise you.

### Examples of Chemistry in Everyday Life

Overview: When you hear the word chemicals, you might think of laboratories and scientists in white coats; but actually, chemicals are all around you, as well as inside of you. Everything in the world is made up of chemicals, also known as matter, or stuff that takes up space. Chemistry is the study of matter—what it is made of, how it behaves, its structure and properties, and how it ...

### Chemistry Faculty Jobs - HigherEdJobs

Why is chemistry important? If you take chemistry or teach chemistry, you'll be asked to answer this question pretty often. It's easy to say chemistry is important because everything is made from chemicals but there are a lot of other reasons why chemistry is a big part of daily life and why everyone should understand basic chemistry. If you've ever wondered about the question yourself, this ...
