Cummins aimed to meet new US government legislation at that time regarding noise levels and clean air requirements. This engine replaced the Small Cam 855 series engines and it features a greater camshaft diameter and the introduction of top-stop injectors. Visual differences.

Cummins Big Cam engine history with CPL notes

There were four generations of the Cummins Big Cam 855 engines, last produced in 1985 and was replaced by the N14. We love the 855 Big Cam because of the raw horsepower it puts out as well as its reliability. You can easily run a Cummins 855 Big Cam 700,000 miles before an overhaul. The Cummins 855 Big Cam was the first engine by Cummins to utilize demand-flow cooling which only cools the engine when the engine demands it.
