Dual Fuel Ranges - Ranges - The Home Depot

When it comes to cooking ranges, the first question is fuel: do you want gas or electric? Gas stoves deliver precise heat control and consistent temperature on the cooktop. The heat in the oven tends to be slightly humid. Electric stoves are quick to heat up up-top, and their ovens produce an even, dry heat. With a gas stovetop and an electric oven, dual fuel ranges are a unique option that combines attributes of both fuel types.

Ranges at The Home Depot

Gas ranges use natural gas that's plumbed behind your range. The gas flame gives you more immediate temperature control and heats quickly. Gas also allows for a more precise temperature. Electric ranges use a 3- or 4-prong power cord and offer energy-efficient, even heating.
