The stacking feature for the HP 3800 switches allows you to connect up to 10 switches and have them act as a single high-bandwidth switch for both data and management. One switch in the stack is designated as "Commander" and one switch is elected to be the "Standby.". The other switches are designated "Member."

### Stack management for the 3800 switches

Install a Stacking Module into an HP 3800 switch and then boot the switch, as described in the HP 3800 Switch Installation and Getting Started Guide. Make sure that stacking is enabled for the switch: Enter the show stacking command. If stacking is disabled, enter stacking enable (in global config context).

### [Book] Hp 3800 Stacking Configuration Guide

Introduction In this article we will setup an IRF stack with two HP 5130 switches that run Comware OS. What is IRF? IRF (Intelligent Resilient Framework) is a proprietary virtualization/stacking technology used in some HPE switches. It has been developed originally by H3C, but later HPE acquired H3C. IRF allows us to interconnect several switches [...]

Depending on which method you want to use, you can follow the steps in order to create the stack. Generally the easiest is to have all switches powered off, the cables connected, and power each switch one by one (let the switch fully boot up and join the stack before powering on the next one) and that way, each stack member ID will match the ...

The same stacking method is used on the 5400R (v3) and 5412, where you can link two 5400R or 5412's). Also this method is NOT to be confused with 'Fabric Stacking' which is available on the 2920,2930M,3800,3810M models, (that is more like Cisco FlexStack, with a dedicated 100Gb stack cable).

Aruba has two types of stacking on the switches above the 2530/2540: Fabric stacking (2920,2930M,3800,3810M) Virtual Fabric Stacking VSF (2930F,5400R) VSF is similar to IRF on the Comware switches. Below is a short instruction to setup VSF. The speed needed as a VSF link is different per switch, lookup the minimal speed needed in the switch manual.

The 2920 series switches from HPE/Aruba has a special feature that no other switches in the old ProCurve/E-Series line-up has; dedicated stacking interfaces. On other HPE switches, stacking merely facilitates "simplified" management, by allowing you to manage any switch in the stack from the stack commander's CLI. On the 2920 series however, you can use dedicated...

HP 3800 stacking topologies The HP 2920 Switch Series can stack up to four switches in a chain or ring topology. In the ring configuration, a link or switch failure creates a chain topology, which enables continued operations. Like the HP 3800 Switch Series, configuration of the HP 2920 is also plug and play.
