Rc Boat Setup Guide

An important part of Radio Control Electric boating is keeping the equipment cool. Both the ESC and motor require water cooling in most cases in order to keep temperatures low. It is recommended to keep motor and ESC temperatures below 140F or 60C. This will ensure the components will not fail by excessive temperature. How ...

RC Electric Boats - Guide for Successful Electric Boating

Gas-powered RC boats are big and powerful, but they're also incredibly noisy. Using gas for a model rewards it with long running times on a full tank of fuel. However, it can be a messy business, and the engines do need regular maintenance. They're easy to operate once set up, though, and they require less tuning than nitro.
