application. But, SPAs can be hard to develop, manage, and test.

Single Page Web Applications by Michael S. Mikowski

Single Page Web Applications shows how your team can easily design, test, maintain, and extend sophisticated SPAs using JavaScript end-to-end, without getting locked into a framework. Along the way, you'll develop advanced HTML5, CSS3, and JavaScript skills, and use JavaScript as the language of the web server and the database.

Single Page Web Applications: JavaScript end-to-end ...

Around the same time, people began developing web applications using what came to be called the single page application (SPA) paradigm. In this approach, the only page that ever loads is the first one when the user loads or reloads the application (via a browser refresh).

Single Page Web Applications | Guide books

Single Page Application (SPA) and Web API Ever since AngularJS was released in 2010, SPA and Web API combination gradually became the most popular way to write modern web applications. And with some good reasons. With this pattern, the entire client side part of the application is loaded just once rather than loading each page from the server.

9 Must Decisions in Web Application Development - Michael ...

By Mike Wasson Single-Page Applications (SPAs) are Web apps that load a single HTML page and dynamically update that page as the user interacts with the app. SPAs use AJAX and HTML5 to create fluid and responsive Web apps, without constant page reloads. However, this means much of the work happens on the client side, in JavaScript.
