What Language Is And It

Language, as described above, is species-specific to human beings. Other members of the animal kingdom have the ability to communicate, through vocal noises or by other means, but the most important single feature characterizing human language (that is, every individual language), against every known mode of animal communication, is its infinite productivity and creativity.

language | Definition, Types, Characteristics, & Facts ...

The following table contains the top 100 languages by estimated number of native speakers in the 2007 edition of the Swedish encyclopedia Nationalencyklopedin. As census methods in different countries vary to a considerable extent, and given that some countries do not record language in their censuses, any list of languages by native speakers, or total speakers, is effectively based on estimates.

List of languages by number of native speakers - Wikipedia

Language - Language - Language and culture: It has been seen that language is much more than the external expression and communication of internal thoughts formulated independently of their verbalization. In demonstrating the inadequacy and inappropriateness of such a view of language, attention has already been drawn to the ways in which one's native language is intimately and in all sorts ...

Language - Language and culture | Britannica

Language and speech are not the same thing. Speech is a broad term simply referring to patterned verbal behavior. In contrast, a language is a set of rules for generating speech. A dialect is a variant of a language.
