While there are documentation services like docsify, according to my experience, the two most common choices for storing technical documentation are storing markdown files in a “docs” folder within your project’s repository and utilizing a Wiki. More specifically when using GitHub, utilizing the GitHub Wiki feature.

Taskade is great for team wiki/documentation if you like outlining in tree-structured format, similar to Workflowy. You can create infinite hierarchy for tasks, notes, and agendas, and easily share, communicate on the same page. ☐☐ helpful 1

## **What's the best team wiki/documentation tool? | Product Hunt**

Technical documentation refers to any document that explains the use, functionality, creation, or architecture of a product. Think of it as a nuts-and-bolts “how to” guide for your users, new hires, administrators, and anyone else who needs to know how your product works. But while that sounds pretty straightforward, the results rarely are.
